

Manufacturer:	Elan Home Systems
Model Number(s):	V883
Comments:	OneHome Version 4.0.1288 and newer
Document Revision Date:	4/10/2008

OVERVIEW AND SUPPORTED FEATURES

The Elan V883 is an 8 X 8 Component Video Controller which switches eight component/composite sources to any of eight component/composite outputs and can connect to the **OneHome** software with a RS-232 serial connection to allow reliable 2-way communication. Up to four V883s can be stacked for a total of 32 zone outputs from eight source inputs.

THE FOLLOWING FEATURES ARE SUPPORTED:

Serial Pass Through: The **V883** can be connected to the RS-232 output on an **Elan S12** or **S8.6**, thus allowing the devices to share a single COM Port on the HomeBrick.

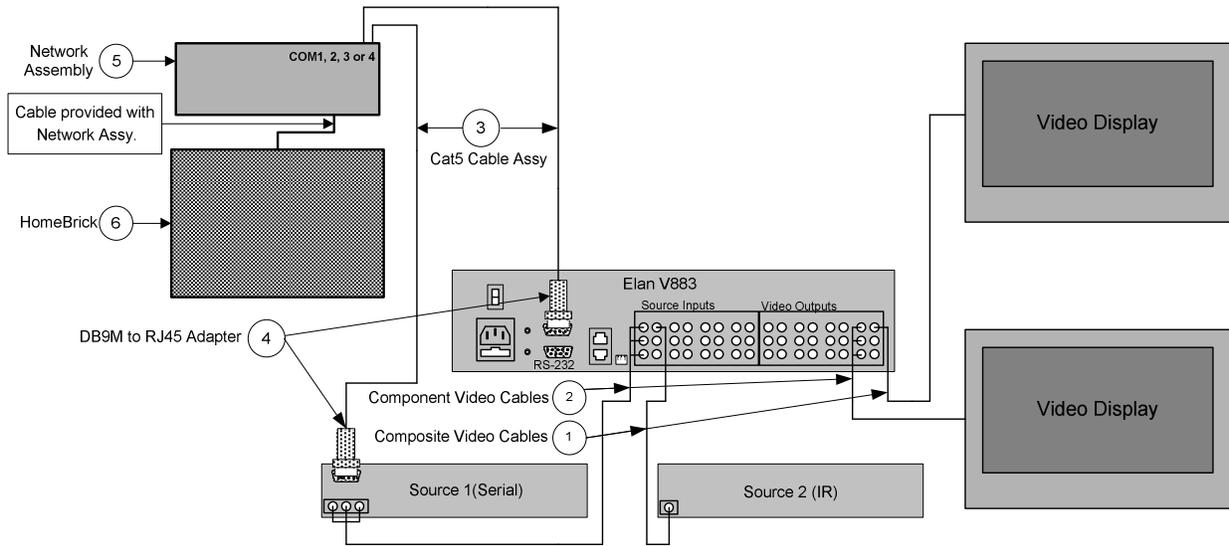

Multiple Chassis Configuration: Up to four V883s can be linked together to provide 32 zone outputs from eight source inputs.

INSTALLATION OVERVIEW

1. During the rough-in phase, install wires for the sources, amplifiers and displays for each zone.
2. Also during the rough-in phase, run a Cat5 wire from the location of the switch back to the Network Assembly of the **OneHome** system for RS-232 communications. Refer to the **RS-232 Connection Options** Integration Note for other options.
3. Install the switch, the sources, amplifier, displays and speakers.
4. Configure the V883 using ViaTools for proper zone switching.
5. Confirm proper audio and video switching as a stand alone system.
6. Connect the **OneHome** system to the switch electrically. See the wiring diagrams for more information.
7. Configure the **OneHome** system for the switch and confirm communication between the switch and the **HomeBrick**. See **HomeLogic Configuration Details**.
8. Test the system by changing sources in a zone to confirm the correct source plays. Test source control for any sources that are to be controlled from the **OneHome** interface.
